Juan José Restrepo Pabón

Software Engineer // enterprise integrations · data & BI · full stack

› juanjoserestrepopabon@gmail.com › Medellín, Colombia › github.com/JuanJRP › juanjrp.github.io
› in/juan-jose-restrepo-pabon

profile

Licensed software engineer (COPNIA) with digital-transformation experience at **Grupo Nutresa**, one of Latin America's largest food companies. I integrate enterprise systems —**Dataverse, SAP and REST APIs**—, automate processes and build data and full-stack solutions, with a business view from a sales background.

experience

Commercial Technology Analyst — Oct 2026 — present
Nutrefríos · Grupo Nutresa

- Integrating the company's commercial systems with Dataverse, REST APIs and SAP.
- Building BI reports and dashboards for the sales teams.

Digital Transformation & Technology Analyst — Jun 2026 — Oct 2026
Alimentos Cárnicos (Meat Business Unit) · Grupo Nutresa

- Migrated processes and tools to the Microsoft ecosystem (Power Platform, Dataverse).
- Built automations and system integrations for internal business processes.

Digital Transformation & Technology Analyst — Feb 2026 — May 2026
Nases EST, on assignment at Alimentos Cárnicos · Grupo Nutresa

- Implemented automations that cut operating time in internal processes.
- Developed internal tools for administrative and operational processes.
- Optimized data structures to improve information integrity and availability.

Digital Transformation Intern — Jul 2025 — Jan 2026
Alimentos Cárnicos S.A.S. · Grupo Nutresa

- Developed internal applications to improve business processes, including support and maintenance.
- Designed databases for new operational requirements and helped deploy cloud services.

Technology Sales Advisor — Dec 2024 — Feb 2025
V V Technology S.A.S.

stack

languages	TypeScript · JavaScript · Python · C# · SQL · Dart
web · mobile	Next.js · React · Node.js · Express · Tailwind CSS · Flutter
data	SQL Server · PostgreSQL · MySQL · MongoDB · BigQuery · PySpark · Power BI
enterprise	Dataverse · Power Platform · Power Automate · SAP integrations · Apps Script · n8n
cloud · devops	AWS · Docker · Linux · Git · GitHub · GitLab
iot	ESP32 · Arduino · Biometric sensors

education & languages

B.Sc. Software Engineering
Institución Universitaria Pascual Bravo, Medellín
2021 — 2026
GPA 4.3 / 5.0 · Professional license (COPNIA)

Technical degree, Leather Goods Manufacturing
SENA (National Learning Service)
2019 — 2020

Spanish — native
English — B2

portfolio

./cyber-vanish
github.com/JuanJRP/cyber-vanish

Vanish from a video call with a finger snap: real-time gesture and audio detection, 14 disintegration effects and virtual-camera output (Meet, Zoom, Teams, OBS).

`Python` `MediaPipe` `OpenCV`

./nyc-taxi-pipeline
github.com/JuanJRP/Pepiline_Taxis_NYC

End-to-end batch pipeline over public NYC taxi trip data: ingestion, distributed processing, Parquet and MongoDB storage, and demand and revenue analysis.

`PySpark` `Docker` `MongoDB`

./llm-finetuning
github.com/JuanJRP/LLMs_Proyect

LoRA fine-tuning of DeepSeek-R1 on a custom dataset of ~106K consumer-goods Q&A pairs, served through a Telegram bot.

`Python` `Hugging Face` `LoRA` `DeepSeek-R1`

./medical-handle
github.com/JuanJRP/MedicalHandle_ESP32

Vital-signs wristband: heart rate, SpO_2, body and ambient temperature, with OLED display and data logging to Excel.

`ESP32` `C++` `IoT`

./threat-manager
github.com/JuanJRP/Threat-Manager

Security threat manager: Next.js frontend with global state and a Node.js API over a relational schema with Prisma migrations.

`Next.js` `TypeScript` `Node.js` `Prisma`

./reserly-api
github.com/JuanJRP/ReserlyAPI

Booking REST API with users, services and roles; repository pattern, EF Core migrations and Swagger docs. Includes a MongoDB Atlas variant.

`C#` `ASP.NET Core` `EF Core` `SQL Server`

./login-nodejs
github.com/JuanJRP/Login_Nodejs

Sign-up and login with bcrypt-hashed passwords and JWT authentication on MongoDB/Mongoose.

`Node.js` `Express` `MongoDB` `JWT`

./polynomial-grapher
github.com/JuanJRP/Polynomial_Grapher

Interactive polynomial grapher with a desktop GUI and PDF export of the results.

`Python` `Matplotlib` `ReportLab`

also: Numerical methods (Python, SciPy) · ContactManager (.NET, MongoDB) · Health-provider portal (Express, EJS) · InfoCyberSecurity (Prolog) · Web scraping (Selenium, XPath) · Algorithms (JavaScript, PSeInt) — github.com/JuanJRP
