profile

Software engineer in the **Commercial Networks Vice-Presidency of Grupo Nutresa**, one of Latin America's largest food companies. I build the internal tools that help teams work faster and decide with data: apps, automations and dashboards. A sales background means I speak the language of the people who use the software, and I'm currently focused on mobile development with **Flutter**.

15 months
from intern to analyst in a corporate vice-presidency

5 teams
executives, finance, marketing, sales and farms decide with my dashboards

~4 apps
internal apps built, plus a needs-management ERP

4.3 / 5.0
university GPA · licensed engineer (COPNIA)

experience

Commercial Technology Analyst
Oct 2026 — present

Commercial Networks Vice-Presidency · Grupo Nutresa (employed through Nutrefríos)

- Built, end to end, an internal ERP where teams log and manage their needs (React, Apps Script, BigQuery).
- Build dashboards that executives, finance, marketing, sales and farm operations use to tell whether a product activity is working and whether each area is on track (Power BI, SAP BusinessObjects).
- Co-developed, in a team of two, Grupo Nutresa's corporate Taxonomy Site.
- Automate processes and reports that used to be manual, and set up the databases behind them (SQL Server).

Digital Transformation & Technology Analyst
Jun 2026 — Oct 2026

Alimentos Cárnicos (Meat Business Unit) · Grupo Nutresa

- Built ~4 internal applications and moved business processes to the Microsoft ecosystem (Power Platform).
- Connected those processes to a mobile app through APIs (Flutter).

Digital Transformation & Technology Analyst
Feb 2026 — May 2026

Nases EST, on assignment at Alimentos Cárnicos · Grupo Nutresa

- Implemented automations that cut operating time in internal processes.
- Developed internal tools and optimized data structures for administrative and operational processes.

Digital Transformation Intern
Jul 2025 — Jan 2026

Alimentos Cárnicos S.A.S. · Grupo Nutresa

- Developed internal applications and databases for new requirements, including support, maintenance and cloud deployment.

Technology Sales Advisor
Dec 2024 — Feb 2025

V V Technology S.A.S.

education & languages

B.Sc. Software Engineering
Institución Universitaria Pascual Bravo, Medellín
2021 — 2026
GPA 4.3 / 5.0 · Professional license (COPNIA)

Technical degree, Leather Goods Manufacturing
SENA (National Learning Service)
2019 — 2020

Languages
Spanish — native
English — B2

Juan José Restrepo Pabón

Software Engineer · 2/2

portfolio

./cyber-vanish

github.com/JuanJRP/cyber-vanish

Vanish from a video call with a finger snap: real-time gesture and audio detection, 14 disintegration effects and virtual-camera output (Meet, Zoom, Teams, OBS).

Python · MediaPipe · OpenCV

./nyc-taxi-pipeline

github.com/JuanJRP/nyc-taxi-pipeline

End-to-end batch pipeline over public NYC taxi trip data: ingestion, distributed processing, Parquet and MongoDB storage, and demand and revenue analysis.

PySpark · Docker · MongoDB

./llm-finetuning

github.com/JuanJRP/llm-finetuning

QLoRA (4-bit) fine-tuning of DeepSeek-R1 1.5B on ~106K Spanish Q&A pairs, served through a Telegram bot.

Python · Hugging Face · QLoRA · DeepSeek-R1

./medical-handle

github.com/JuanJRP/MedicalHandle_ESP32

Vital-signs wristband: heart rate, SpO_2, body and ambient temperature, with OLED display and data logging to Excel.

ESP32 · C++ · IoT

./threat-manager

github.com/JuanJRP/Threat-Manager

Security risk management: assets, threats, risk matrix and action plans; Next.js, Express API with JWT and roles, and PostgreSQL via Prisma. With CI.

Next.js · TypeScript · Node.js · Prisma

./reserly-api

github.com/JuanJRP/ReserlyAPI

Booking REST API with users, services and roles; repository pattern, EF Core migrations and Swagger docs. Includes a MongoDB Atlas variant.

C# · ASP.NET Core · EF Core · SQL Server

also: JWT login (Node.js, MongoDB) · Polynomial grapher (Python) · Numerical methods (Python, SciPy) · ContactManager (.NET, MongoDB) · Health-provider portal (Express, EJS) · InfoCyberSecurity (Prolog) · Web scraping (Selenium, XPath) · Algorithms (JavaScript, PSeInt) — github.com/JuanJRP
