profile

Software engineer, currently Commercial Technology Analyst in the **Commercial Networks Vice-Presidency of Grupo Nutresa**, one of Latin America's largest food companies. I build internal tools that help teams work faster and decide with data. I started out in tech sales, so I translate business needs into software well. Current focus: **Flutter**.

15 months
from intern to analyst in a corporate vice-presidency

5 areas
dashboards for executives, finance, marketing, sales and farms

1 ERP
built end to end to manage the needs of internal teams

4.3 / 5.0
university GPA · licensed engineer (COPNIA)

experience

Grupo Nutresa
Jul 2025 — present

Commercial Technology Analyst
Oct 2026 — present

Commercial Networks Vice-Presidency · employed through Nutrefríos

- Gather requirements from executives, finance, marketing, sales and farm operations, and build the dashboards they use to assess product activities and each area's operation (Power BI, SAP BO).
- Lead the migration of processes to Power Platform: about four internal apps so far, exposed as APIs for the Flutter mobile app I also develop.
- Co-developed, in a team of two, Grupo Nutresa's corporate Taxonomy site.
- Automate processes and reports that used to be manual, and set up the databases behind them (SQL Server).

Digital Transformation & Technology Analyst
Feb 2026 — Oct 2026

Meat Business Unit (Alimentos Cárnicos) · Feb–May 2026 through Nases, a temp staffing agency

- Designed and built end to end an internal ERP where teams manage their needs (React, Apps Script, BigQuery).
- Automated manual administrative and operational processes and reorganized their data structures.

Digital Transformation Intern
Jul 2025 — Jan 2026

Meat Business Unit (Alimentos Cárnicos)

- Developed internal apps and databases for new requirements, including support, maintenance and cloud deployment.

Technology Sales Advisor
Dec 2024 — Feb 2025

V V Technology S.A.S.

- Product consulting and demos for customers; closing sales and after-sales follow-up.
